The *Updates until*: date is important: your update has to be downloaded, installed and registered before this expiry date.

If you can only see the Personal Edition download option, your subscription period has expired, and you will need to purchase the corresponding IBExpert 12 month software subscription.

As long as you install the new *Customer version* setup.exe over the existing older version, you should have no problems starting and working with your new IBExpert version.

All services related to IBExpert software require a valid subscription. The registration system has been altered and services are no longer available free of charge for older versions.
