

hkIBRS.exe

The control center is for defining your jobs. What really runs is a small tool that runs as a service:

Name	PID	Status	Username	CPU	Memory (a...	UAC virtualisat...
csrss.exe	5936	Running	SYSTEM	00	492 K	Not allowed
ctfmon.exe	4260	Running	fhasovic	00	7,284 K	Disabled

IBExpert.exe	3668	Running	fhasovic	00	480 K	Enabled
IpOverUsbSvc.exe	2676	Running	SYSTEM	00	120 K	Not allowed
lazarus.exe	3380	Running	fhasovic	00	2,596 K	Disabled

The [IBExpert Server Tools](#) allow you to distribute this software also to your customer. And if you don't want your customer to construct his own tasks and mess around with your structure, you can do it in the following way: use [IBExpert BackupRestore](#), a small tool called `hkIBRS.exe` (the `IBExpertBackupRestore Scheduler`). You simply need to install this tool once, with the install flag, and a service is automatically created. The definition of your job is set in a simple text file in the directory, `IBExpertBackupRestore\IBExpertBackupRestore.tasks*.tsk`, so it is not necessary to run this application on your customer side.
