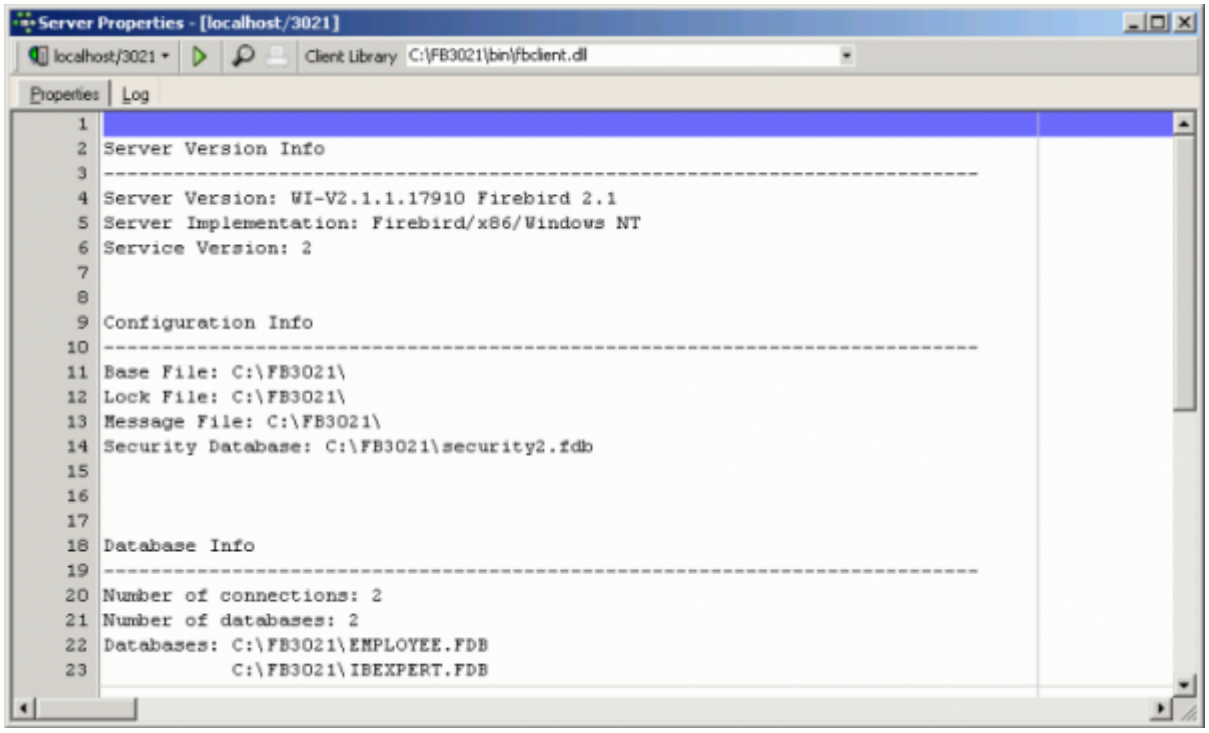
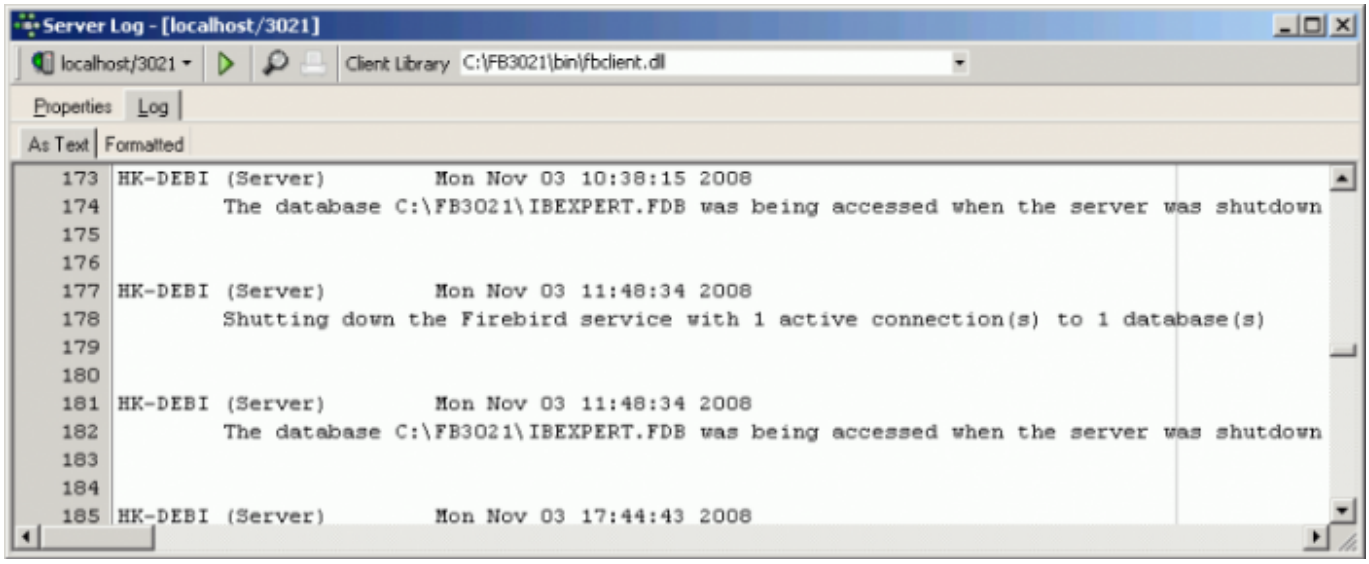
Server Properties/Log

The *Server Properties* page displays the following information for a server or instance selected from the drop-down list in the top left-hand corner of the window:

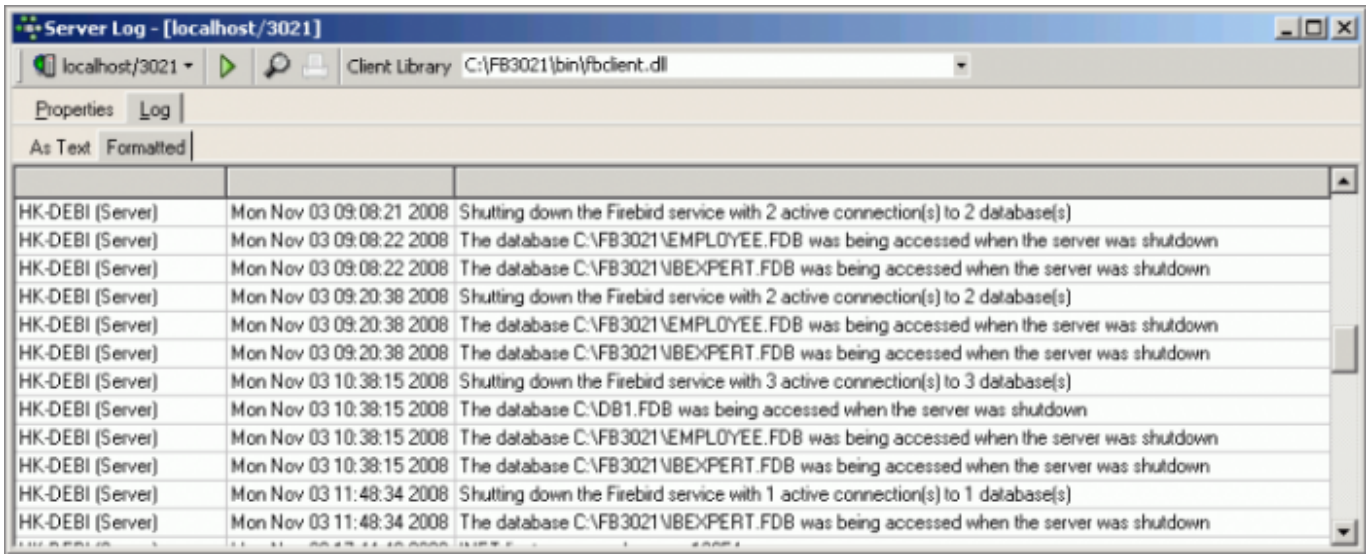


It includes server version information, configuration information and database information, particularly interesting when working with remote and/or multiple connections.

The log can be started using the *Retrieve* (green arrow) icon. The log page displays information either as text:



or in a grid form:



The log may even be printed - the print preview can be opened using the magnifying glass icon:
