

Server Properties/Log

The *Server Properties* page displays the following information for a server or instance selected from the drop-down list in the top left-hand corner of the window:

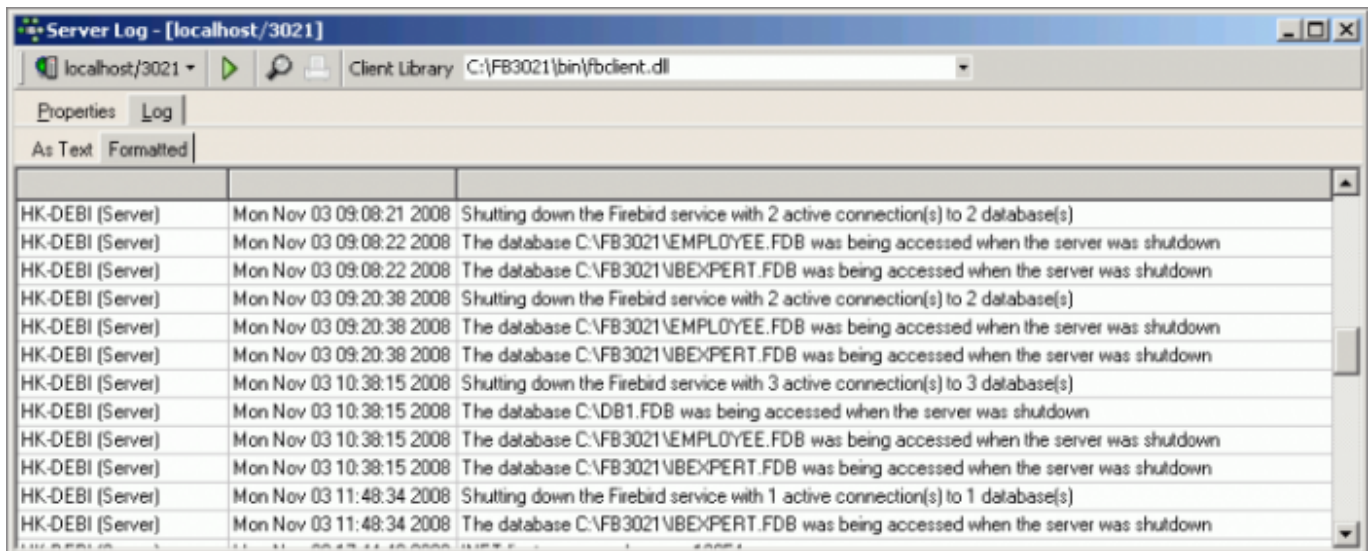

It includes server version information, configuration information and database information, particularly interesting when working with remote and/or multiple connections.

The log can be started using the *Retrieve* (green arrow) icon. The log page displays information either as text:

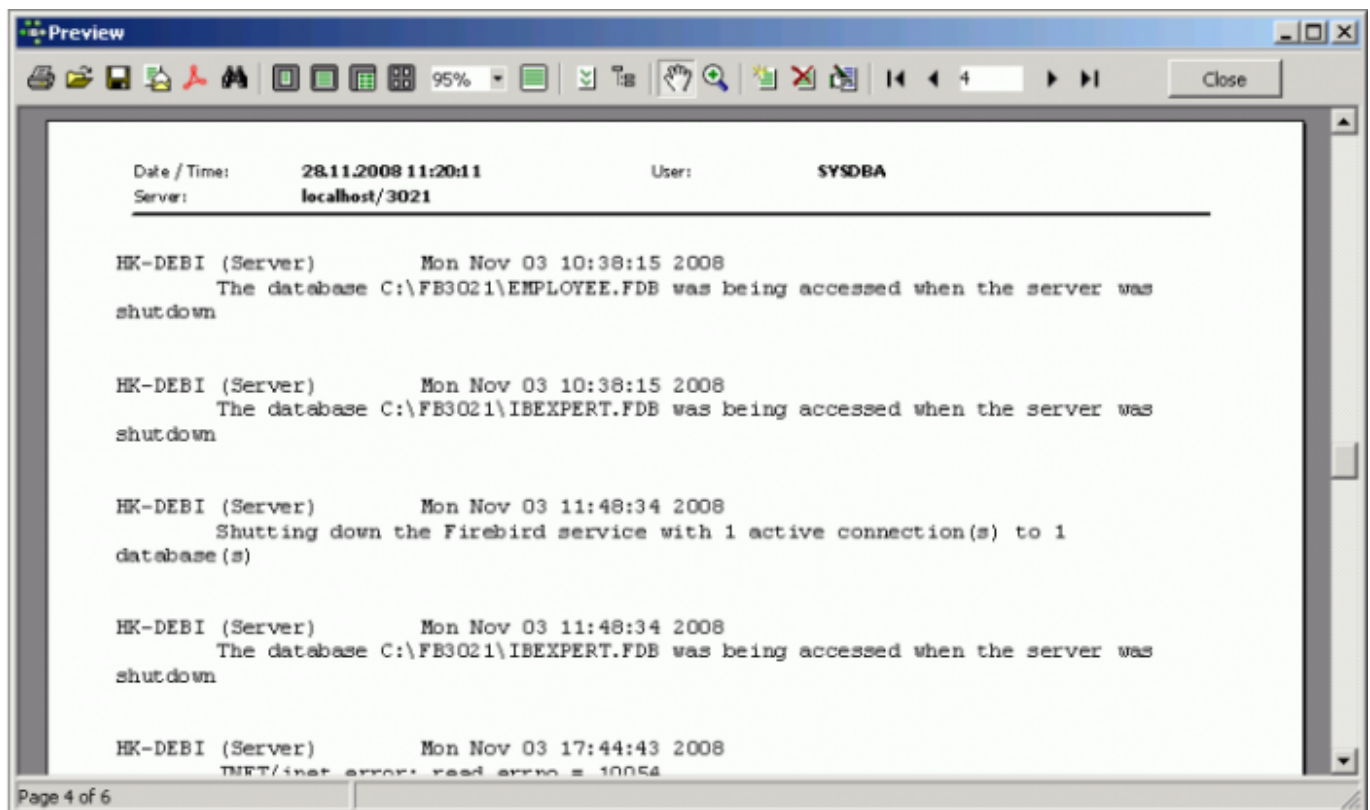

or in a grid form:

The log may even be printed - the print preview can be opened using the magnifying glass icon:

Preview window showing a formatted view of the server log entries. The window title is 'Preview'. The toolbar includes icons for print, save, copy, paste, zoom, and other navigation functions. The main content area displays the log entries in a formatted, monospaced font. The status bar at the bottom indicates 'Page 4 of 6'.
