F_AGEINWEEKSTHRESHOLD

compatibility to FreeUDFLib, FreeUDFLib AvERP

Entrypoint ageinweeksthreshold compatible with UTF-8

Inputs/Outputs

```
    Input      TIMESTAMP    (older) date optionally time 1
               TIMESTAMP    (newer) date optionally time 2
               INTEGER      min. value
               INTEGER      min. value is used (0 = no, 1 = yes)
               INTEGER      max. value
               INTEGER      max. value is used (0 = no, 1 = yes)
    Output     INTEGER      difference in (integer) weeks between timestamp 1
and timestamp 2
```

Syntax

```
    Sunday is 1st day of the week.
    If the two dates are in the same week, the return value is 0.
```
