

ibec_Power

ibec_Power raises Base to any power.

Description

For fractional exponents Base must be greater than 0.

The ibec_Power returns NULL if it is impossible to raise Base to specified power (for example, ibec_Power(-4, 0.5) will return NULL).

Syntax

```
function ibec_Power(Base, Exponent : double precision) : double precision;
```

Example

```
execute IBEBlock
returns (cout varchar(100))
as
begin
    cout = ibec_Power(2, 3);
    suspend;
end
```
