ibec_RenameFile

Description

ibec_RenameFile attempts to change the name of the file specified by OldFile to NewFile.

If the operation succeeds, RenameFile returns True. If it cannot rename the file (for example, if a file called NewName already exists), it returns False.

This function now supports Unicode (UTF8) file names. You can still use ANSI names, necessary checks and conversion are performed automatically

Syntax

```
function ibec_RenameFile(OldName : string; NewName : string) : Boolean;
```
