

ibec_GetServerLog

The IBEBlock function, `ibec_GetServerLog`, retrieves a Firebird/InterBase® server log using the Services [API](#) (if available) and saves it into a specified file (or variable).

Description

No additional description...

Syntax

```
function ibec_GetServerLog(ConnectParams : string; FileName : variant) :  
variant;
```

If `FileName` is specified as `NULL` or an empty string, the `ibec_GetServerLog` function returns the server log as the result. Otherwise it returns `NULL`.

Example

```
execute ibeblock  
as  
begin  
    res = ibec_GetServerLog('ServerName=localhost/3070; User=SYSDBA;  
Password=masterke;  
                                ClientLib="C:\Program  
Files\Firebird25\bin\fbclient.dll",  
                                'W:\srvlog.txt');  
end
```
