

ibec_CreateConnection

The `ibec_CreateConnection` creates an active database connection.

Description

No additional description...

Syntax

```
ibec_CreateConnection(ConnectionType : integer, ConnectionParams :  
string);
```

The `WireCompression` option (if both client and server support them) was introduced in IBExpert version 2020.01.06. To enable compression it is necessary to specify `'WireCompression=TRUE'` (or just `'WireCompression'`) in the options string.

Example

```
execute ibeblock  
as  
begin  
    FBSrc =  
ibec_CreateConnection(__ctFirebird, 'DBName="localhost:d:\DB1.FDB";  
    ClientLib=fbclient.dll;  
    user=SYSDBA; password=masterkey; names=UTF8; sqldialect=3');  
    FBDest =  
ibec_CreateConnection(__ctFirebird, 'DBName="localhost:d:\DB2.FDB";  
    ClientLib=fbclient.dll;  
    user=SYSDBA; password=masterkey; names=UTF8; sqldialect=3');  
    ibec_UseConnection(FbSrc);  
  
    ibec_CloseConnection(FBSrc);  
    ibec_CloseConnection(FBDest);  
end
```
