ibec_CompressVar

ibec_CompressVar compresses Value using the LZ77 algorithm.

Syntax

```
function ibec_CompressVar(Value : variant; Options : string) : string;
```

Description

ibec_CompressVar compresses Value using the LZ77 algorithm and returns the string that represents a compressed content of Value.

Parameters

The Options parameter is reserved for future use.

Example

```
execute ibeblock
as
begin
  -- Compressing
  MyVar = ibec_LoadFromFile('D:\Script.sql');
  MyVar = ibec_CompressVar(MyVar, '');
  -- Decompressing
  MyVar = ibec_DeCompressVar(MyVar, '');
  ibec_SaveToFile('D:\Script.copy.sql', MyVar, __stfOverwrite);
end
```
