

Comparing scripts with IBEBlock

```
execute ibeblock
as
begin
  cbb = 'execute ibeblock (LogMessage variant)
        as
        begin
          ibec_progress(LogMessage);
        end';

  ibec_CompareMetadata('c:\myscripts\master.sql','c:\myscripts\subscriber.sql'
, 'E:\CompRes.sql','', cbb);
end
```

Using the ServerVersion parameter:

```
execute ibeblock
as
begin
  cbb = 'execute ibeblock (LogMessage variant)
        as
        begin
          ibec_progress(LogMessage);
        end';

  ibec_CompareMetadata(MasterDB, SubscriberDB,
                      'E:\CompRes.sql',
                      'OmitDescriptions; OmitGrants; ServerVersion=FB1?',
                      cbb);
end
```
