Inserting files into a database

IBEBlock can be used to insert files extremely simply and quickly into your database:

```
execute ibeblock
as
begin
  MyVar = ibec_LoadFromFile(C:\f.jpg);
  insert into ... values (..., :MyVar);
  commit;
end
```

Another possible way is to use different SET BLOBFILE statements before each INSERT/UPDATE statement:

```
SET BLOBFILE 'C:\f.jpg';
INSERT INTO ... VALUES (..., :h00000000_FFFFFFFF);
SET BLOBFILE 'C:\f2.jpg';
INSERT INTO ... VALUES (..., :h00000000_FFFFFFFF);
SET BLOBFILE 'C:\f3.jpg';
INSERT INTO ... VALUES (..., :h00000000_FFFFFFFF);
```
