- [Configuring the database for a backup](#)
- [hkIBRS.exe](#)
- [Backup restore checklist](#)
- [Troubleshooting](#)

The **IBExpertBackupRestore** is one of the modules in the and [IBExpert Server Tools](#), and is the service for Firebird backups and restores. To set up this service, you can use the [hkSCC.exe](#) (HK-Software Services Control Center) interface.

It is a comprehensive utility, providing automatic backup and restore facilities for Firebird and InterBase® databases with backup file compression even an option to automatically mail backup/restore log files. This tool is unfortunately not included in the IBExpert Developer Studio [free IBExpert Personal Edition](#).

For regulations regarding distribution of any of the IBExpert Server Tools modules ([hkSCC.exe](#), [ibescript.exe](#), [ibescript.dll](#) and [fbcrypt](#)) together with your application, please refer to the [IBExpert Server Tools documentation contents page](#).
