## **IBExpert Windows menu**

The IBExpert Windows menu offers a number of options to visually arrange all open windows in IBExpert.

Windows	
Nindows Manager	Alt+0
Close All	
Eascade	
Tile Horizontally	
Tile Vertically	
Minimize All	
Arrange	
Procedure : [ALL_LANGS] : Employee_2_1 (localhost/3021:C:\FB3021\EMPLOYEE	.FDB)
Table : [COUNTRY] : Employee_2_1 (localhost/3021:C:\FB3021\EMPLOYEE.FDB)	
Table : [PROJ_DEPT_BUDGET] : Employee_2_1 (localhost/3021:C:\FB3021\EMPLC	OYEE.FDB)

Please note that all open windows are also displayed as buttons on the Windows bar (directly above the status bar), and in the DB Explorer on the Windows page (please refer to Windows Manager for further information).

## **Windows Manager**

The Windows Manager can be opened using the IBExpert Windows menu item *Windows Manager*, by using the key combination [Alt + O], or simply by clicking on the *Window* tab heading directly in the DB Explorer.

For more information regarding this, please refer to DB Explorer / Windows Manager.

## Close All

*Close All* is an option to close all open windows with one simple mouse click, ideal when closing all open work for one project or database, before beginning work on a new project or database, or finally finishing work for the day (...or night!).

## Cascade / Tile / Minimize / Arrange

The IBExpert Windows menu offers the following options, for arranging all open windows:

• Cascade: all open windows are arranged one behind the other, in a cascading format,

displaying the title bar of each window.

- Tile Horizontally: all open windows are displayed adjacently, one below the other.
- **Tile Vertically:** all open windows are displayed adjacently, one next to the other.
- **Minimize All:** this option minimizes all open windows simply and quickly with a single mouse click.
- **Arrange:** this option arranges the windows as currently viewed, e.g. all minimized windows are arranged in a horizontal row alongside each other.

If the SDI User Interface has been specified under Environment Options / User Interface, then only the *Cascade* option is offered here.
