

# F\_GETRANDOM

## input/output-compatibility to rFunc (GETRANDOM)

Entrypoint getrandom **compatible with UTF-8**

## Inputs/Outputs

Input	INTEGER	max. number of random
Output	INTEGER	integer-random number between 0 and value of
parameter 2		

## Syntax

This function can create more than one different random-no. in one second because the generator is set with the actual systemtime and the process-ID, so that is is impossible, that 2 calls in the same second return the same random-no.

TestSQL

```
SELECT F_GETRANDOM(10000) FROM RDB$DATABASE;  
SELECT F_GETRANDOM(NULL) FROM RDB$DATABASE;
```
