

# F\_INTRANDOM

## function from adhoc

Entrypoint intrandom **compatible with UTF-8**

## Inputs/Outputs

Input	INTEGER	min. value of random-no.
	INTEGER	max. value of random-no.
Output	INTEGER	integer-random-no. with value between parameter 1 and parameter 2

## Syntax

This function can create more than one different random-no. in one second because the generator is set with the actual systemtime and the process-ID, so that is is impossible, that 2 calls in the same second return the same random-no.

TestSQL

```
SELECT F_INTRANDOM(100, 10000) FROM RDB$DATABASE;
```

```
SELECT F_INTRANDOM(NULL, NULL) FROM RDB$DATABASE;
```
