F_AGEINWEEKS

compatibility to FreeUDFLib, FreeUDFLibC, FreeUDFLib AvERP

Entrypoint ageinweeks compatible with UTF-8

Inputs/Outputs

```
   Input      TIMESTAMP     (older) date optionally time 1
              TIMESTAMP     (newer) date optionally time 2
   Output     INTEGER       difference in (integer) weeks between timestamp
1 and timestamp 2
```

Syntax

```
   Sunday is 1st day of the week.
   If the two dates are in the same week, the return value is 0.
```
