

# F\_AGEINWEEKSIISO

## function from adhoc

|            |               |                       |
|------------|---------------|-----------------------|
| Entrypoint | ageinweeksiso | compatible with UTF-8 |
|------------|---------------|-----------------------|

## Inputs/Outputs

|        |           |   |
|--------|-----------|---|
| Input  | TIMESTAMP | (older) date optionally time 1                                    |
|        | TIMESTAMP | (newer) date optionally time 2                                    |
| Output | INTEGER   | difference in (integer) weeks between timestamp 1 and timestamp 2 |

## Syntax

ISO-version of F\_AGEINWEEKS. Monday is 1st day of week.  
If the two dates are in the same week, the return value is 0.
