

ibec_Concat

Concatenates two or more strings into one.

Description

Use `ibec_Concat` to concatenate an arbitrary number of strings. Each parameter is a string-type expression. The result is the concatenation of all the string parameters.

Using the plus (+) operator has the same effect on two strings as using the `ibec_Concat` function:

```
S := 'ABC' + 'DEF';
```

Tip: The plus operator is faster than `ibec_Concat`.

Syntax

```
function ibec_Concat(s1 [, s2,..., sn]: varchar): varchar;
```
