

ibec_Explode

ibec_Explode returns an [array](#) of strings.

Description

ibec_Explode returns an array of strings, each of which is a substring of Str formed by splitting it on boundaries formed by the string Delimiter.

Syntax

```
function ibec_Explode(Delimiter : string; Str : string) : array of string;
```

Example

```
execute ibeblock
returns(val varchar(10))
as
begin
    Str = 'just a test';
    Delimiter = ' ';
    Words = ibec_Explode(Delimiter, Str);
    for i = 0 to ibec_High(Words) do
    begin
        val = Words[i];
        if (val is not null) then
            suspend;
        end
    end;
end;
```
