

# ibec\_ds\_Bof

Indicates whether or not a cursor is positioned at the first record in a [dataset](#).

## Description

Call `ibec_ds_Bof` to determine if the cursor is positioned at the first record in a dataset. If `ibec_ds_Bof` returns `True`, the cursor is unequivocally on the first row in the dataset. Otherwise this function returns `False`.

## Syntax

```
function ibec_ds_Bof(Dataset : variant) : Boolean;
```

## Example

```
execute ibeblock
as
begin
  select * from RDB$FIELDS as dataset MyDataset;

  ibec_ds_Last(MyDataset);
  while (not ibec_ds_Bof(MyDataset)) do
  begin
    ...
    ibec_ds_Prior(MyDataset);
  end

  ...

  close dataset MyDataset;
end
```
