

Working with JSON Data

The following set of functions have been implemented to access JSON data:

ibec_json_Parse	Parses a text which contains JSON data. Returns pointer to a root node of JSON tree.
ibec_json_Free	Destroys a JSON object created with ibec_json_Parse function.
ibec_json_SelectNode	Selects a node using its name/path/index relatively to specified JSON node.
ibec_json_NodeType	Returns the type of the specified JSON node.
ibec_json_GetNodeValue	Returns the value of specified JSON node.
ibec_json_GetNodeName	Returns name of specified node.
ibec_json_ChildCount	Returns number of child nodes for specified node.
JSON namespace	All JSON functions and constants also available via namespace JSON.

Example
