

ibec_ftp_CloseSession

Description

ibec_ftp_CloseSession destroys an FTP session object created with the [ibec_ftp_OpenSession](#) function.

Syntax

```
function ibec_ftp_CloseSession(FTPSession : variant) : variant;
```

The `ibec_ftp_CloseSession` function destroys an FTP session object specified by the `FTPSession` variable and always returns `NULL`. The function doesn't perform any network operations, you should call the `ibec_ftp_Disconnect` functions first if there is an active connection.

Example

```
FTPSession = ibec_ftp_OpenSession('HostName=myftpserver.com; UserName=me; Password=mysecret');
  try
    ...
  finally
    ibec_ftp_CloseSession(FTPSession);
  end;
```
