

ibec_ftp_PutFile

Description

ibec_ftp_PutFile copies a local file to the FTP server.

Syntax

```
function ibec_ftp_PutFile(FTPSession : variant; LocalFileName : string;  
FTPFileName : string) : boolean;
```

ibec_ftp_PutFile copies a file specified by the LocalFileName variable from the local computer to the FTP server. If LocalFileName is specified as NULL or an empty string the content of the internal data buffer will be copied to the FTP server. FTPFileName specifies the name to use on the FTP server. ibec_ftp_PutFile returns TRUE in case of success. Otherwise it returns FALSE.

Example 1

```
FTPSession = ibec_ftp_OpenSession('HostName=myftpsrvr.com; UserName=me;  
Password=mysecret');  
try  
  if (ibec_ftp_Connect(FTPSession)) then  
    begin  
      if (ibec_ftp_ChangeDir(FTPSession, '\uploads')) then  
        begin  
          ibec_ftp_PutFile(FTPSession, 'd:\mydata\db.fdb', 'db.fdb');  
        end;  
      ibec_ftp_Disconnect(FTPSession);  
    end;  
  finally  
    ibec_ftp_CloseSession(FTPSession);  
  end;
```

Example 2

```
FTPSession = ibec_ftp_OpenSession('HostName=myftpsrvr.com; UserName=me;  
Password=mysecret');  
try  
  if (ibec_ftp_Connect(FTPSession)) then  
    begin  
      if (ibec_ftp_ChangeDir(FTPSession, '\uploads')) then  
        begin  
          FileData = ibec_LoadFromFile('d:\mydata\db.fdb');  
          ibec_ftp_SetProperty(FTPSession, 'DATA', FileData);  
        end;  
    end;  
  finally  
    ibec_ftp_CloseSession(FTPSession);  
  end;
```

```
        ibec_ftp_PutFile(FTPSession, NULL, 'db.fdb');  
        ibec_ftp_SetProperty(FTPSession, 'DATA', ''); -- Just to clear the  
data buffer  
    end;  
    ibec_ftp_Disconnect(FTPSession);  
end;  
finally  
    ibec_ftp_CloseSession(FTPSession);  
end;
```
