

Creating a script from a Database Designer model file

The following IBEBlock illustrates how to create a script from a [Database Designer](#) Model file:

```
execute ibeblock
as
begin
  FileName = 'C:\model.grc';
  if [[ibec_FileExists]](FileName) then
    [[ibec_CreateModelScript]](FileName, 'C:\model.sql',
__msoDontQuoteIdents + __msoIncludeDescriptions);
end
```
