FOR ... DO loops

Examples

```
EXECUTE IBEBLOCK
RETURNS (I INTEGER)
AS
BEGIN
  FOR I = 0 TO 100 DO
    SUSPEND;
END
```

It is possible to use the CONTINUE statement within FOR loop to proceed to the next iteration of FOR:

```
EXECUTE IBEBLOCK
RETURNS (I INTEGER)
AS
BEGIN
  FOR I = 0 TO 100 DO
  BEGIN
    IF (I < 20) THEN
      CONTINUE; -- SUSPEND will not be executed
    SUSPEND;
  END
END
```
